## ROBOTICS

Miriam College

Summer Program, April/May, 2017

Program	Description
<b>Robotics for Young Children - Lego Education We Do 1.0 and Story Starter</b>	We Do concept is an easy –to-use sets that provides a taste of what robotics is all about. Let your student discover Robotics and add more power to Learning. Maths, Science, and Language ideas
<b>Basic Robotics – Lego Mindstorm NXT</b>	In this 5-day robotics camp, participants will learn the basics of designing, building, and programming NXT 2.0, a Lego Mindstorms robot. With the facilitation of a certified Lego robotics teacher-trainer and pioneer of robotics education in the country, students will be able to develop 21st century skills of critical thinking, collaboration, communication, creativity, and leadership through various hands-on activities and interclass competitions.
<b>Advanced Robotics -Mindstorm and EV3</b>	Students design and build programmable robots using high quality motors, sensors, gears, wheels, axles, and other technical components. By using hands-on robotics, students will gain a better understanding of how technology works in real world applications. The solution enables students to understand and interpret two-dimensional drawings to create three-dimensional models; build, test troubleshoot and revise designs to improve robot performance; Gain practical, hands-on experience using mathematical concepts such as estimating and measuring distance, time and speed.
