# MIRIAM COLLEGE

Nestled within a lush, green, and peaceful campus in Quezon City, Metro Manila is one of the foremost women's colleges in the Philippines. Miriam College is a non-profit, non-stock Catholic educational institution that offers academic programs from pre-elementary to post graduate and adult education levels, that develop both the learning and caring competencies of students and are enriched by a wide range of national, regional, and international linkages. Although we are primarily a women's school, our pre-elementary, adult education, graduate, and deaf education programs accept male students.

For over 85 years, Miriam College has established a reputation for forming women leaders in service. The quality of our academic programs is evidenced by our consistent Level III certification by the Philippine Accrediting Association of Schools, Colleges and Universities (PAASCU) for our basic and higher education units. In addition, our College unit was among the first 10 Higher Education Institutions granted full autonomy by the Commission on Higher Education.

Our expertise in early childhood education has also led to partnerships with government agencies and NGOs for teacher-training programs across the country. Opportunities for corporate social responsibility partnerships can be found in the programs and services of our various advocacy centers, sponsorship of scholarships in various academic programs, including the Miriam Adult Education (MAE) program for underprivileged adults and out-of-school youth through support for academic and TESDA-registered vocational programs.

In recent years, Miriam College has responded to the growing trend and demand for international education by securing strategic academic partnership agreements with several colleges and universities in the United States of America, Australia, New Zealand, the United Kingdom, Japan, Taiwan, the Republic of Korea, and the People's Republic of China. These partnerships include joint and twinning programs, student and faculty exchange, undergraduate and post-graduate research-internships, and collaborative research projects.
