

The Professional Program

Miriam College is committed to helping busy adults achieve their educational goals amid the demands of work and family life.

We are anchored on the premise that learning is a lifelong process. As such, we espouse continuous growth and development for professionals as well as for homemakers, volunteers, early retirees and other individuals who are not part of the formal workforce.

Responding to the needs of the growing number of college students who do not finish their education for various reasons, Miriam College has launched the Professional Program to give qualified males and females the opportunity to balance schooling with other responsibilities.

Earn a degree while working!

The Professional Program

The Professional Program has been carefully designed to provide excellent academic offerings for adult learners who wish to complete their undergraduate studies or pursue a second degree but are unable to attend regular classes due to constraints posed by distance, time, domestic duties, and other circumstances.

By combining the equivalency of work experience with the flexibility of distance education, adult students can now fast-track their way to their degree.

The Professional Program

Through equivalency, an enrollee's work experience can help him/her earn a degree. When applicable, relevant skills and expertise acquired in the workplace are granted their equivalent weight in academic units.

Previously earned college units, if any, are also taken into consideration.

Your work experience matters!

Mindful of the distinctive needs and limitations of the adult learner, the Professional Program also employs a blended learning approach that complements modular and online or web-based learning with occasional face-to-face sessions.

The Professional Program

Miriam College invites all qualified applicants to explore the Professional Program.

For more information and details on admission requirements, please contact

The College Registrar
(02) 580-5400 ext. 2026
rparagas@mc.edu.ph
